

Paul Schockemoehle 2019 Contract System

Beginning with the 2019 breeding season the Paul Schockemoehle Stud requires a contract for the use of their frozen semen.

You are buying a stud fee with a breeding contract for a specific mare and will receive two doses for the initial price.

Once we are notified that your mare is checked 28 days in foal, that contract is fulfilled, whether you obtained the conception with one dose or two.

If you did not use the second dose that you purchased with the initial contract, and wish to use it on another mare or on the same mare another season, you must sign another Frozen Semen Stud Fee Contract and pay a *full* stud fee. In this case, if you don't get a conception with your "remaining" dose, you will be provided with a single dose for the second contract but will have to pay for shipping it. Basically, you are buying one conception for one mare with each contract.
